# Phase I: Assignment 4

- I made a new GitHub account. The GitHub ID is **AFA20SCM32D.**
- I made a new issue with the title **AFA20SCM32D adding first name** & then gave the issue according to the instructions.

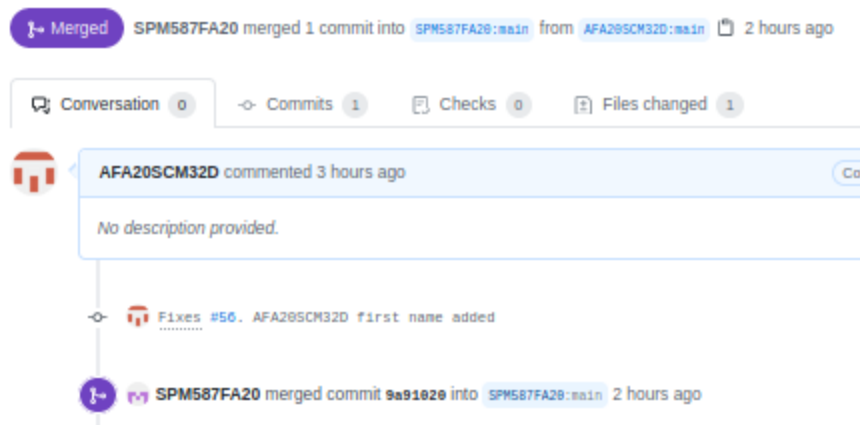

- Then I forked project **SCM587FA20** and cloned it into my local device.
- I edited a.java and added my Git ID into the file.
- Then I committed and pushed the changes as below.
- This image shows changes in a.java
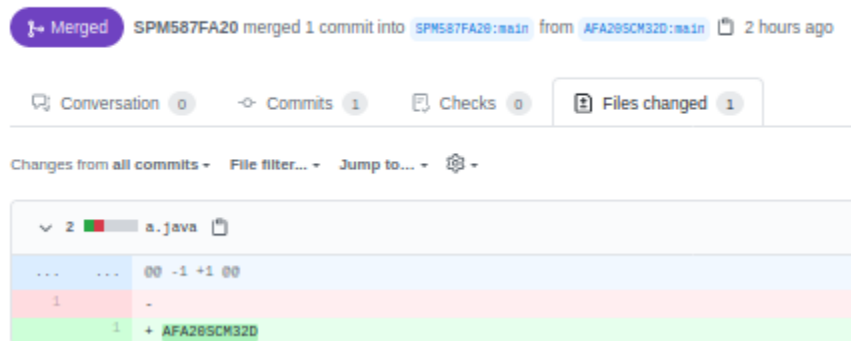

New pull request

The final Pull request.
